

Features

- 2-in-1 tube: regular T8 tube with backup battery
- Built-in lithium batteries
- Easy battery shutoff switch for a long stocking time
- Anti-electric shock safety switches - patented
- Easy to install and cost-effective
- 5-year warranty

Specifications

Color Temperature	3000K, 3500K, 4000K, 5000K
Wattage	15W
Length	4ft
CRI	>80
Input Voltage	AC120-277V
Light Output	1890lm
LED Type	SMD2835
Power Factor	>0.92
Luminous Efficiency	>120lm/W
Battery Backup Time	90 minutes
Light Output When on Battery	420 lm at 3.5W
Rated Hours	50,000 hours
Warranty	5-year

Product Compliance & Certifications:

- ETL
- DLC
- 90 minutes battery time per industry standard

Description

Aleddra's G3 Emergency LED T8 Tube is a 2-in-1 tube that can be used as a regular T8 lamp and automatically draws power from its built-in battery and lasts more than 90 minutes on battery at 420 lm. It is double-end wired on line voltage (ballast bypass). It comes with dual safety switches on both end caps, which had been documented by a federal agency to be the most effective means of electric shock protection for an LED T8 tube. It is a cost-effective option for many facilities such as office buildings, schools, hotels, multifamily apartments, hallways, corridors, and stairs. It required to operate on an always-on circuit in order to keep the battery charged at all time.
