## FLEXWATT + FLEXCOLOR

2FT	6W	9W	12W
3FT	10W	12W	15W
4FT	10W	15W	25W

**HOW IT WORKS**  
 Our exclusive LED driver is designed to operate at 90%+ efficiency at each wattage setting. Our competitor's drivers have much lower efficiency (as low as 60%) which results in poor performance and reduced efficacy.

**WATTAGE CHOICES**

3FT	10W	12W	15W
4FT	10W	15W	25W

	4000°K NEUTRAL
	5000°K COOL

**HOW IT WORKS**  
 We select the highest efficacy, multiple color LED diodes from quality suppliers, and mount them on the circuit board. A proprietary LED binning process ensures color consistency between fixtures. The FlexColor technology ensures the desired color is selected, every time.

## PRODUCT SELECTION GUIDE (CONTINUED)

Default lumen package (wattage and CCT) are shown below in **bold**. There are two ways to achieve a non-default lumen package and/or CCT:

1. You can easily adjust in field via our FlexWatt and FlexColor internal switches. 2. Have us adjust the FlexWatt and FlexColor at the factory for an additional charge.

**IMPORTANT NOTE ON WIRING METHOD**

As you will see on the following pages, there are many possible uses for The Linear Transformer. If your application calls for multiple light bars in a single fixture, there are 2 possible ways to order and wire (see below).

**PARALLEL**  
Multiple incoming power cables can be grouped together under the ballast cover to make connection to incoming power and controls.

**SERIES (WITH LINKING CABLE)**  
This method is the fastest. The first light bar uses an incoming power cable, additional light bars are linked using “linking cables” which are available in a variety of lengths. Linking cable are sold separately.

**SERIES (WITH SEAMLESS CONNECTOR)**  
This method provides a near seamless appearance between the bars. The first light bar uses an incoming power cable, additional light bars are linked using “seamless connectors” which are sold separately.

PRODUCT DESCRIPTION

The EMG-H Series LED emergency drivers are UL Listed for factory or field installation, unrivaled emergency solutions for LED product with Internal driver. It allows the same LED luminaire to be used for normal and emergency operation and works in conjunction with an AC LED driver that convert new or existing LED fixtures into emergency lighting. It includes a long-life recyclable Lithium battery, and is backed by a 5-Year Warranty.

INSTALLATION

The Emergency Back up will dim the connected fixtures down to a level where they will run without line voltage for 90Min. For fixtures that are connected to a wall dimmer the Emergency Back up will override the current dim setting and provide the maximum illumination possible at the selected wattage for 90Min.

How many fixtures can be connected? This is determined by the "maximum luminaire power load" listed for each respective back up wattage that we offer. The Luminaire power load is referencing the amount of power the fixture or fixtures consume. This is selected by the FLEX WATT setting of each fixture. When using multiple fixtures, the wattages are added together to get the total power load. For example, if the 4FT PRO LBI is being used, it has a maximum wattage setting of 25W, that means a maximum of 4 fixtures can be attached to the 8W emergency backup and a maximum of 12 fixtures can be used with the 25W back up version. For another example, if a single 4FT PRO LBI set at the highest wattage setting is attached to the 25W back up it will output full brightness for 90Min.

OPERATION

When AC power fails, The EM-H Series emergency LED driver immediately switches to the emergency mode for a minimum of 90 minutes. When AC power is restored, the emergency driver automatically returns to the charging mode.

### LINKING CABLES & SEAMLESS CONNECTORS

Use Linking Cables and Seamless Connectors to easily connect the power and control wires from one light bar to another. The ...-DIM version of the linking cables and seamless connector link all connections (AC power; 12V Aux power; 0-10V DIM signal) from light bar to light bar. Use these items to control all light bars from one sensor or incoming cable connection. The ...-NODIM version of these items only links the AC power. Use these items to AC power all light bars with a single power feed; but separate control signals into individual groups.

### 4.7IN SPACER CONNECTOR | RP-LBI-SRC-4.7IN (SINGLE PACK)

Use the 4.7in Spacer Connector to bring the length of the bar system to a standard dimension (24in, 36in, 48in). This is useful when retrofitting linear fixtures of a standard length. It allows for the bar to be centered on each standard-length fixture. Each 4.7in spacer connector comes with (2) Seamless Connector-DIM.

**\*Note: spacer does not emit light**

### SENSOR KITS | RP-LBI-OC2-A (STANDARD RANGE - SINGLE PACK) RP-LBI-OC3-A\_LR (LIMITED RANGE - SINGLE PACK)

Sensors kits for LBI are Tri-Level, remote controllable high frequency radar sensor designed to easily integrate with the LBI bars. It is totally plug&play! It can dim the light bars down to conserve more energy from both motion and daylight. The sensor controls the 0-10V DIM signal in both directions from the Sensor unit. Each sensor kit comes with (1) sensor (4.7 inch); (1) surface mount magnetic clip; (2) Seamless Connector-DIM; (1) 12" Linking Cable-DIM. See **RP-LBI-OC2-A/OC3-A** data sheet for more details.

### SURFACE MOUNT MAGNETIC CLIP | RP-LBI-SMM-10P (10 PACK ONLY)

The Surface Mount Magnetic Clip provides the most universal method for attaching the light bar to a wall, ceiling, or fixture to be retrofitted. The mounting tabs that extend perpendicularly from the light bar can be easily removed by bending and breaking on the pre-scored line. The strong rare-earth magnets are intended to hold light bars in place while installing mechanical fasteners. Not intended for permanent installation with magnets only.

*Two of these clips are included in each light bar kit.*

### SUSPENDED IN-LINE KIT | RP-LBI-SIL-KIT-10P (10 PACK ONLY)

The Suspended In-Line Kit includes everything needed to suspend LBI from the ceiling.

**The complete kit includes:** Suspended In-Line Bracket, Aircraft Cable (9.8ft), Adjustable cable gripper, and a ceiling anchor.

### SUSPENDED IN-LINE BRACKET (\*BRACKET ONLY\*) | RP-LBI-SIL-BRACKET-10P (10 PACK ONLY)

The Suspended In-Line Bracket (bracket only) is a wide clip that fastens over the junction between 2 LBI light bars to keep them straight in-line and provides mounting points for common suspension methods (air craft cable, drop chain, etc.) This part number is for the bracket only.

## PARTS & ACCESSORIES

### T-BAR CLIPS

RP-LBI-T1516-10P (PARALLEL – DIRECTLY UNDER THE T-BAR – 10 PACK)  
RP-LBI-T1516-90-10P (PERPENDICULAR – ACROSS THE BAR – 10 PACK)

The T-Bar Clips is the fastest way to mount a light bar to a T-Bar grid ceiling. Works with standard 15/16" grid only.

### BLADE CLIP | RP-LBI-BLC-10P (10 PACK ONLY)

The Blade Clip is designed to provide a retrofit solution for fixtures that have thin sheet metal or plastic film reflectors commonly found on high bay fixtures. The rotating mounting blade provides a degree of freedom to align the mounting holes on the blade with fastening locations that may not be in-line with the light bar or where the distance between available mounting points is greater than the length of the light bar. It is common to attach the blade to the same point holding the thin reflector to the fixture frame.

### UP DOWN CLIP | RP-LBI-UDC-10P (10 PACK ONLY)

Use the Up/Down clip with our suspended in-line kit to clip a shorter bar to provide up-light. For example if suspending a 4ft, use the 3ft OR 2ft as the up-light, (so there is room for the suspension-kit connection). The RP-LBI-SIL-KIT comes with wire clips to hold linking power cable for UP bars in-line and neat. (linking cable not included)

### LBI JUNCTION BOX | RP-LBI-JBOX-1.5X4

The LBI junction box is used to connect LBI wiring to branch circuits. Connections are made from the LBI Junction box to the Light Bar using seamless connector or linking cable. The internal wiring (except optional switch) are rated to 600V (for 347V operation) For undercabinet or task lighting, the junction box includes an optional 120V ON/OFF switch that can be installed into a rectangular knock-out on the cover. Kit includes 1pc RP-LBI-SSC-DIM.

### 12FT 90-DEGREE INCOMING POWER CABLE | RP-LBI-G1-IP-90DEG-12F-DIM

Use the 90 degree Incoming Power Cable for an easy and clean connection to suspended LBI fixtures.
